Room40 uses data, video, images and sound to improve security in the broadest sense. Our technology helps governments to improve the safety and security of its citizens, but can also be used in the private sector. Privacy and security interfere with each other. Room 40 can help you make this trade-off.

WeGroup offers a peer to peer property insurance platform. With this we enable our users to share risks with their peers, which transfers part of the responsibilities from the insurance company to the users. To accomplish this, we use a mix of cutting-edge tech for the purposes of transparency, fraud-detection and automation.

PROGRES startup village

Meet Square is a platform or gateway for collaboration between companies, which allows different partners of a common project to exchange information and manage their projects in a simple, efficient and secure way. We offer a network where managers can easily connect instead of sending plenty of e-mails.
